

Team Duncombe's
Lego Week

Upper School Activity - Wednesday 27th January 2021

Hello Upper School,

Your challenge today is to build a boat raft and it must:

- Float
- Continue to float when holding a selection of coins

Can you also tell us which type of boat would float better, a small one or a larger one and why.

Now you may think this is an easy task, but there are scientific reasons as to how and why a boat floats. Watch this YouTube video which may help you with your ideas

<https://www.youtube.com/watch?edufilter=NULL&v=32kbMMt-3-s>

Don't forget to share your work and results, so we can see how you're getting on.

Enjoy, Team Duncombe
