

Team Duncombe's
Lego Week

Lower School Activity - Tuesday 26th January 2021

Your challenge today Lower School is all about towers and repeating patterns.

Duncombe Bear has created some Lego towers and he's made sure they all have lovely patterns.

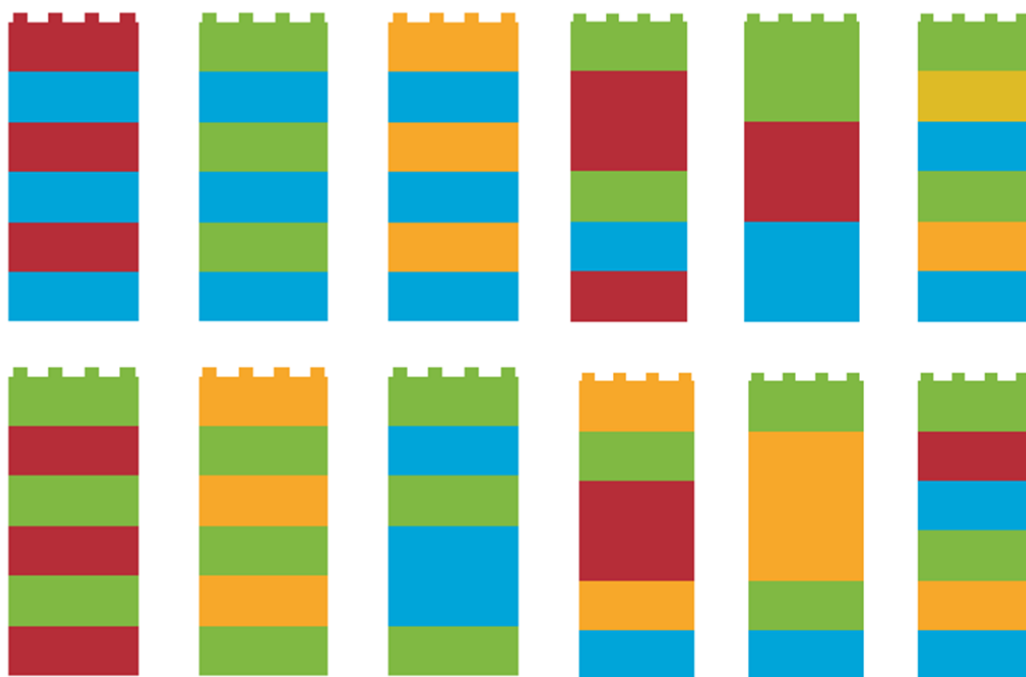

Now it is your turn:

- ◆ Have a go at building some of these towers and patterns.
- ◆ Which ones did you find easiest and hardest?
- ◆ Could you see any repeating patterns?
- ◆ Investigate building some of your own towers with repeating patterns. Can someone in your family carry on your pattern with the Lego.

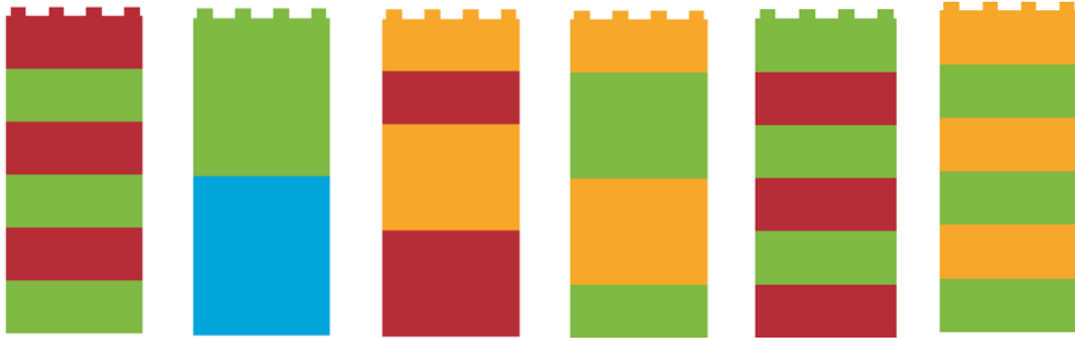

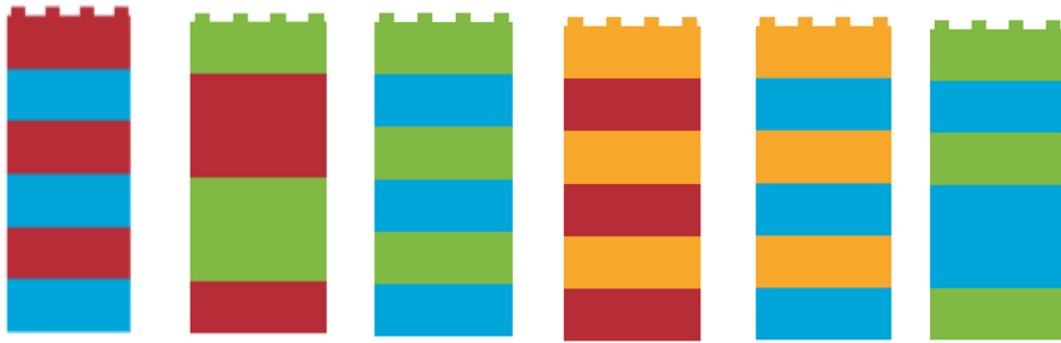

Don't forget to share your work, we love to see how you're getting on.

Enjoy, Team Duncombe

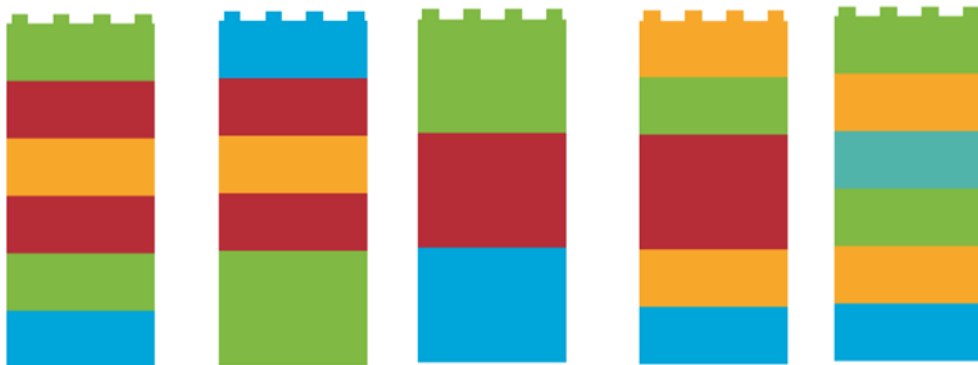

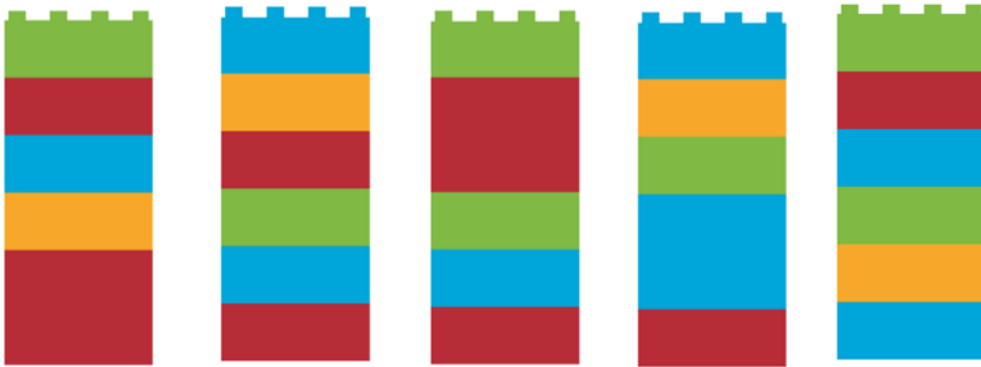

How many patterns can you complete?

How many towers can you build like these?

Can you build towers with more than 2 colours ?

Can you colour in the bricks to design your own pattern?
